

Mythreiya Anand

Sharjah, UAE | +971 582461159 | mythreiyand0428@gmail.com | LinkedIn | Portfolio

Computer Science Engineering graduate with hands-on experience in Data Analytics through internships and real-world projects. Skilled in Python, SQL, Excel, Power BI, Pandas and NumPy, with experience in data preprocessing, analysis, visualization, dashboard development, machine learning and UiPath workflow automation. Worked on 56,000+ sales records and built AI/ML projects spanning federated learning, computer vision, GenAI automation and healthcare analytics.

Experience

- | | |
|---|-------------------------|
| National Small Industries Corporation, India App Development Intern | Jan - Feb 2024 |
| <ul style="list-style-type: none">Developed an Android Expense Splitter using Kotlin, XML and Android Studio, implementing tip calculation, custom percentage splitting, currency selection and multi-screen navigation. | |
| Network Geeks, India Data Science Intern | June - July 2025 |
| <ul style="list-style-type: none">Executed end-to-end data pipelines by performing advanced preprocessing, cleaning, and exploratory data analysis using Python, Pandas, and NumPy to derive actionable business insights. | |
| Besant Technologies, India Data Analytics Intern | Feb - May 2026 |
| <ul style="list-style-type: none">Conducted statistical analysis on 56,046 sales records (2020-2022) using SQL and Python across sales, product, customer, territory and returns datasets, identifying revenue drivers, top-selling products and high-return regions to guide inventory and regional sales planning.Performed data cleaning and transformation; leveraged Power BI for advanced data visualization and dashboard development, delivering actionable insights across sales, product, customer, and regional datasets. | |

Education

- | | |
|---|------------------|
| Rajalakshmi Engineering College, B.E CSE | Thandalam, India |
| <ul style="list-style-type: none">Cumulative GPA: 7.7 | June 2026 |
| India International School | Sharjah, UAE |
| <ul style="list-style-type: none">CBSE | 2022 |

Skills & abilities

- Technical: Proficient in Python, SQL, NumPy, Pandas, HTML, CSS.
- Tools & Platforms: Excel, Power BI, MySQL Workbench, Visual Studio code, GitHub, Android Studio, UiPath.
- Personal: Communication, Leadership, Public Speaking, Management, Problem Solving.
- Languages: English, Tamil, Telugu, Hindi

Certificates

- Ui Path - Robotic Process Automation
- NPTEL - Joy of computing using Python
- Microsoft - Introduction to Data Analytics
- Wipro Talentnext - Data Science
- Besant Technologies - SQL, PowerBI, Excel, Python

Publications

Cross-Silo Prediction of Hospital Readmissions using a Federated Learning Framework.

- Presented at the 5th ICECMSN (2025), organized by Hindusthan Institute of Technology & the IEEE Computational Intelligence Society. (DOI: [10.1109/ICECMSN68058.2025.11383090](https://doi.org/10.1109/ICECMSN68058.2025.11383090))

Achievements

- 1st Place at Medaicon, a hackathon organized by Biomedical Department of REC
- 1st Place at Prompt Event, a Prompt engineering contest held during DEVFEST24 in REC.
- Successfully completed the UI/UX relay conducted by Intellexa REC.

Activities and Honors

- | | |
|--|----------------|
| Yuva (Young Indians) REC | |
| <ul style="list-style-type: none">Communications Associate | 2023-24 |
| <ul style="list-style-type: none">Co-Chair of Climate Change | 2024-25 |
| <ul style="list-style-type: none">Chair of Climate Change | 2025-26 |

Projects

MEDSURE: Secure Medicine Verification and Authentication System

- Designed and implemented a blockchain-integrated system to securely track and verify medicines across the pharmaceutical supply chain.
- Utilized AES encryption and QR-based authentication to detect and prevent counterfeit drugs at every transaction stage.
- Strengthened drug authenticity, traceability, and trust between manufacturers, distributors, pharmacies, and consumers.

MYCAFE: Restaurant Management System.

- Features include digital menu handling, order placement, table allocation, and invoice generation.
- Built with separate dashboards for kitchen staff, waiters, and administrators, with role-based access control.
- Designed to optimize restaurant workflow, reduce human errors, and improve customer service efficiency.

HOSPITAL READMISSION PREDICTION:

- Designed and implemented a privacy-preserving federated learning framework that enables multiple hospitals to collaboratively train a readmission prediction model without sharing raw patient data.
- Simulated three hospital data silos using the MIMIC-IV dataset and applied FedAvg with an XGBoost classifier across 50 communication rounds.
- Achieved 84.3% accuracy and 0.821 AUC, integrating a Streamlit MLOps dashboard and hybrid SHAP + Gemini explainability for patient-level risk predictions.

AUTOMATED EMAIL LANGUAGE CONVERTER & SMART REPLY GENERATOR:

- Designed and implemented a UiPath automation that automatically reads incoming emails and translates their content into a selected language.
- Integrated Generative AI to analyse email content and generate contextually appropriate responses.
- Automated the complete workflow from email retrieval and translation to reply generation and email sending, reducing repetitive manual processing.

SKIN CANCER DETECTION: Trained and optimized ML model for detecting various Skin Cancer types.

- Utilized convolutional neural networks (CNNs) and transfer learning for accurate detection.
- Processed dermatoscopic image datasets to identify melanoma, basal cell carcinoma, and other skin conditions.
- Achieved high accuracy and precision in identifying cancerous skin patterns through extensive model training.
