Driven to build innovative tech solutions and advancing as a developer through hands-on experience in meaningful, real-world projects. Dedicated to continuous learning and making a lasting impact through challenging and purpose-driven work.

Experience

National Small Industries Corporation

Chennai, India

App Development Intern

Jan - Feb 2024

- Developed a mobile application using Android Studio, focusing on creating clean and user-friendly interfaces. Designed layouts, implemented core functionalities, and ensured smooth navigation between screens to enhance overall user experience.

Network Geeks

Chennai, India

Data Science Intern

June - July 2025

- Completed a hands-on internship involving data analysis and modelling using Python, NumPy, and Pandas. Delivered data preprocessing, cleaning, and transformation tasks, as well as data visualization projects.

Education

Rajalakshmi Engineering College, B.E CSE

Thandalam, India

- Cumulative GPA: 7.64

June 2026

India International School

Sharjah, UAE

- CBSE

2022

Skills & abilities

- Technical: Proficient in Python, HTML, SQL, Excel, CSS.
- Tools & Platforms: VS code, Git, GitHub, Visual Studio 2022, Android Studio, UiPath.
- Personal: Communication, Leadership, Public Speaking, Management, Problem Solving.
- Languages: English, Tamil, Telugu, Hindi

Certificates

- Ui Path - Robotic Process Automation
- NPTEL - Joy of computing using Python
- Microsoft - Introduction to Data Analytics
- Wipro Talentnext – Data Science

Achievements

- 1st Place at Medaicon, a hackathon organized by Biomedical Department of REC
- 1st Place at Prompty Event, a Prompt engineering contest held during DEVFEST24 in REC.
- Successfully completed the UI/UX relay conducted by Intellexa REC.

Activities and Honors

Yuva (Young Indians) REC

- Communications Associate
- Co-Chair of Climate Change
- Chair of Climate Change

2023-24

2024-25

2025-26

Projects

MEDSURE: Developed a QR-based medicine verification system using Python and MongoDB to prevent counterfeit drugs. Implemented secure batch tracking and an easy scan-and-verify workflow for pharmacists.

MYCAFE: Built a restaurant management system using PHP/Python and MySQL with role-based dashboards for staff. Designed features for digital menus, order handling, and invoice generation to improve daily operations.

HOSPITAL READMISSION PREDICTION: Created a privacy-focused patient readmission prediction model using federated learning in Python. Implemented data preprocessing, model training across decentralized data, and built a dashboard for risk visualization.

AUTOMATED EMAIL LANGUAGE CONVERTER & SMART REPLY GENERATOR: Built a UiPath automation that reads incoming emails, translates them into any chosen language, and saves the translated text locally. Integrated GenAI to generate an appropriate reply and automatically send it back to the sender.
